The Second Term Test

"Al-Hasan Ibn al-Haytham" was famous Muslim scientist who was born in 965 in El-Basra, Iraq. He made important contributions to the understanding of vision, optics and light. His methodology of investigation, in particular using experiment to verify theory, shows certain similarities to what later became known as the modern scientific method. Through his Book of Optics (Kitab al-Manazir) and its Latin translation (De Aspectibus), his ideas influenced European scholars. Today, many consider him the "Father of modern Optics". Ibn al-Haytham lived during a creative period, which was known as the golden age of Muslim civilisation that saw many fascinating advances in science, technology and medicine. This great scholar died 1040 Cairo, Egypt.

Part one: A/Reading comprehension: (7pts)

Task01: Read the text and fill in the ID card (2 pts)

Full name	Date and place of birth	Job	Achievements	Date and place of death
Ibn Hasan Ibn alHaytham
